Water Wagon

*Features and Options*

---

## Midwest Bio-Systems

*Composting equipment designed  
and built by compost professionals  
engaged sustainable agriculture.*

---

## Adjustable Hitch - Quick Connect Hoses – Hitch Jack

The hitch can be adjusted vertically 8" in 1" increments. In its current orientation, attaching the hitch block using the next set of holes achieves a 2" vertical adjustment. Turning the hitch block 180° in the same set of holes achieves a 1" vertical adjustment.

## Optional Inoculation Tank (All Water Wagon Models)

## Standard 8 Function Valve System

**Unique 8 Function Valve System Lets You Pump From:**

- Large Tank to Turner
- Small Tank to Turner
- Small Tank to Large Tank
- Large Tank to Small Tank
- Water Source to Large Tank
- Water Source to Small Tank
- Circulate Large Tank – Mixing
- Circulate Small Tank - Mixing

## Optional Hydraulically Driven Pump (Replaces Gasoline Pump Engine)

# Aeromaster WT-1000 Water Wagon

---

## ■ Standard Features:

- Easy Pull, 2-Wheel Trailer
- Cone Bottom Tank
- 5 hp. Oil Protection Pump

## ■ Optional Equipment

- Electric Valve for ON/OFF from the Tractor Cab
- Inoculation System including 65 gal. Tank, Valves, Plumbing
- Hydraulically Driven Pump (Replaces Gasoline Pump Engine)

## Aeromaster WT-1400 Water Wagon

**Extremely versatile, easy pull, 2-wheel trailer with water tank, pump, valves and plumbing for operation with an Aeromaster pull type compost turner. Aeromaster Water Wagons attach to the back of the turner. An optional electric valve allows for operator control of water on/off from the tractor cab. The optional inoculation tank provides the flexibility of adding biological inoculants to the larger water tank.**
